

PLYMVENT[®]

clean air at work

Engineered for performance
Developed with innovation
Redefining your air quality

AeroGuard

Where technology meets air quality control

Introducing the AeroGuard

Experience a new level of environmental awareness with our air monitor

This climate monitoring system is designed to offer crucial insights. With the **free mobile app**, users can access real-time data on air quality in any given environment. This user-friendly app empowers individuals to tailor notifications according to their preferences, particularly focusing on elevated pollution levels, enabling timely and informed actions. Additionally, if preferred, once the AeroGuard detects a rise in metrics, it can send a trigger to an external system, such as your HVAC system.

The importance of air quality monitoring for occupational health

The air we breathe significantly influences our well-being, with pollutants having the potential to accumulate to undesirable levels unnoticed. From a human health and safety perspective, air quality monitoring is important. Assessing in the air quality in the environment is crucial for ensuring our health and safety. It's crucial to maintain a healthy indoor environment to prevent sickness and maintain productivity levels.

360° LED-Ring

Quick visual representation of the air quality

Wide air grid

Monitoring pollutants and climate factors

Circular economy

Made from 46% recycled plastic

Occupies minimal space

Dimensions 130 mm x 210 mm

Connector

Easy to set up on any wall or tripod mount

User friendly maintenance

Easily replaceable particle sensor

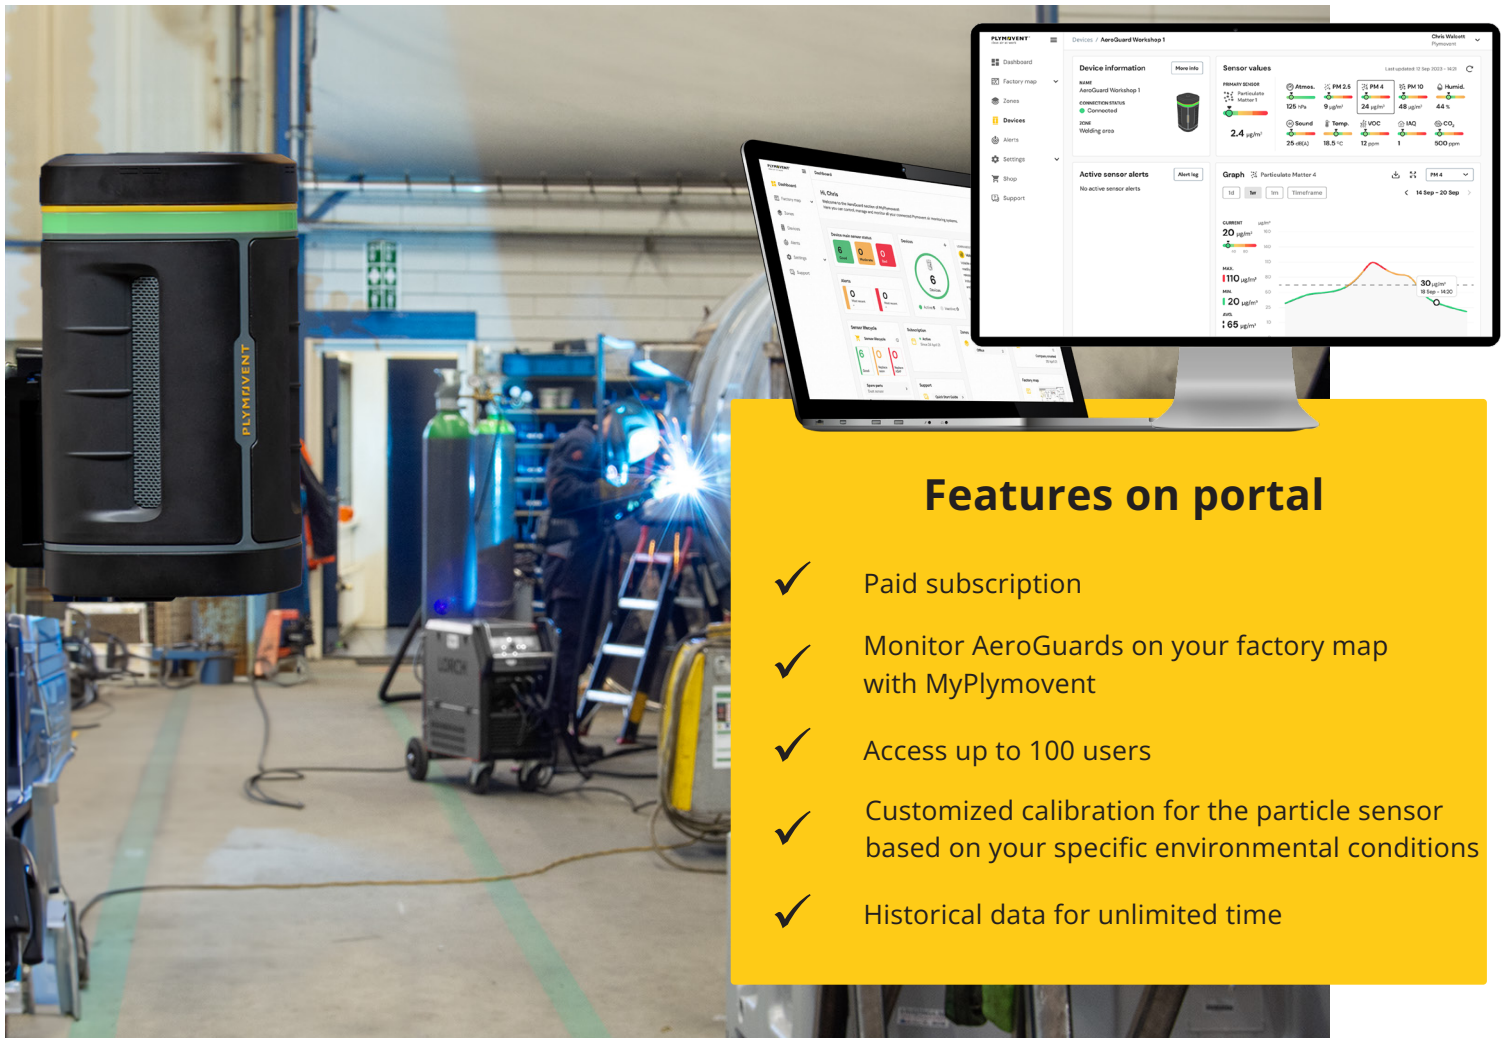

Sensor cover plate

Features on mobile app

- ✓ Free mobile app available for iOS and Android
- ✓ Monitor AeroGuards listed
- ✓ Access up to 3 users
- ✓ Initial calibration of the particle sensor
- ✓ Historical data for 30 days

Features on portal

- ✓ Paid subscription
- ✓ Monitor AeroGuards on your factory map with MyPlymovent
- ✓ Access up to 100 users
- ✓ Customized calibration for the particle sensor based on your specific environmental conditions
- ✓ Historical data for unlimited time

The AeroGuard offers a wide range of sensors, monitoring multiple pollutants and climate factors
